## Who we are?

**WattSun Energy (India) Private Limited is an ISO 50001-2011 Energy Management System Certified Company** also registered under Indian company's acts 1956, registered in Government of Kerala, Small Scale Industries and also empanelled in Kerala Small Industries Development Corporation. WattSun is promoted by Engineers and professionally managed promoters who are associated with solar industry for decades.

We are an **EPC SMART Solar solution provider** including, consultancy, setting up of Solar Power Plants and also undertaking works from concept to commissioning and after service maintenance. We have in house experienced team, capable for identification of new sites by analysis of solar potentials and assessing of adequate evacuation facility which can handle uninterrupted power transmissions from the solar & wind farms.

Our products are manufactured at world renowned renewable energy power companies like AE & Refusol from Germany, Delta from Denmark, Optimal Power from Australia, Emerson and Photovoltaic companies like Canadian Solar, Vikram Solar and Emmvee Solar Etc. We also have our own off grid and on grid systems as well. We do provide a complete turnkey solution and also do retail sales for solar needs.

Our management team boasts of collective excellence, industrial insights, innovative abilities and executive caliber in designing and executing projects. At WattSun, we are committed for providing world class solar solutions for industrial, commercial and domestic applications ranging from KW to MW scale. WattSun aims to deliver the world's most reliable and cost-effective solar energy solutions.
