- Partnership Spotlight

Table of CONTENTS

03 STEPPING INTO A GREENER 2026

Sustainability, innovation and the road ahead

14 RELIANCE HJT SOLAR MODULES

Next-generation performance for high-efficiency solar solutions

06 CHRISTMAS CARNIVAL 2025

Celebrating togetherness, joy and the spirit of the season

16 PARTNERSHIP SPOTLIGHT: FAVOURITE HOMES

Celebrating trust, collaboration and shared growth

10 GREEN ENERGY INDIA EXPO – BENGALURU

Connecting ideas, technologies and opportunities

17 SOLAR & BESS KNOWLEDGE SUMMIT 2025

Industry insights driving the future of energy storage and solar

12 RE-NXT 2025 – VIJAYAWADA

Strengthening our renewable presence across regions

18 CAREERS AT WATTSUN GROUP

Opportunities to grow with a purpose-driven solar family

STEPPING INTO A GREENER 2026

A New Year. A Shared Responsibility.

As the new year unfolds, 2026 stands before us as a year of promise, progress and possibility. For Wattsun, this moment represents more than growth—it reflects a continued commitment to building a cleaner and more sustainable future for the communities we serve.

Every milestone we have achieved so far has been guided by trust—trust from customers, partners and institutions who believe in our vision and capabilities. As we move forward, this trust remains the foundation of everything we do.

New Year Celebrations at Wattsun Family

MOMENTUM BUILT ON TRUST AND PERFORMANCE

Progress That Powers Confidence

WattSun - Kerala's most trusted solar company, now India's. Over the past years, Wattsun has taken decisive steps that strengthen its role in India's renewable energy landscape, through Green Factory, Wattsun became the South India distributor for Jio Sparq Microinverters, bringing advanced solar technology closer to customers across the region. Most recently, introducing Reliance HJT modules has further reinforced our ability to deliver high-efficiency, future-ready solar solutions.

Our project portfolio continues to grow with purpose, the successful completion of the 300 kW Cyberpark project, the ongoing project 1MW at Caritas, and multiple ISRO projects across Kerala and Tamil Nadu reflect our technical expertise and execution excellence.

With 7,500+ satisfied customers, a cumulative installed capacity exceeding to 40 MW, over 12 years of operational experience, and a strong presence across five locations in South India, Wattsun continues to expand—responsibly and sustainably.

“ *A sustainable future is built not in isolation, but through shared purpose and collective effort.* ”

EXPANDING OUR IMPACT BEYOND ENERGY

Building Futures, Not Just Systems

While renewable energy remains our core focus, Wattsun's vision extends beyond infrastructures, through the Wattsun Football Academy, we are investing in young talent aged between 4 to 12, nurturing discipline, confidence and skill—values that shape stronger individuals and communities.

Our commitment to sports development was further reflected in 2025 when Wattsun proudly powered Thiruvananthapuram Kombans as one of the title sponsors in Super League Kerala – Season 2. These initiatives align with our broader belief that sustainability is not only about clean energy, but also about empowering people and inspiring the next generation.

Looking Ahead

The path to 2026 is shaped by experience—by lessons learned, challenges overcome, and trust earned. As we move forward, we do so with clarity and confidence, ready to scale new heights and make a greater impact.

“ *The future is greener when vision, trust and action come together.* ”

WATTSUN CHRISTMAS CARNIVAL 2025

Celebrating Togetherness, Joy and the Spirit of the Season

A Warm Beginning at Kovalam

On 24th December, the Wattsun family came together at Aadisakthi Leisure Resort, Kovalam, to celebrate Christmas in a spirit of unity, joy and gratitude. From 9:00 AM onwards, team members began arriving at the venue, welcomed with refreshing welcome drinks and festive smiles.

The celebrations began with a photo session, capturing candid moments of togetherness. A defining highlight of the morning was the Wattsun Family group photograph, taken together on the resort's steps — a powerful visual representing unity across departments, roles and locations.

“ When we come together as one family, every celebration becomes meaningful. ”

Setting the Festive Tone

The celebration then moved into the banquet hall, where the event was smoothly anchored by Ms. Sandra Mary Rowland and Mr. Abhinav Padman. Adding colours and excitement to the occasion was our cheerful Santa, Mr. Jesin, whose lively presence instantly filled the hall with festive energy. Christmas hats were distributed to everyone, creating a joyful and unified atmosphere.

The programme opened with a prayer, followed by a welcome address and Christmas message by Mr. Terance Alex, Founder & CEO – Wattsun Group. In his address, he reminded everyone that Christmas is not only a celebration, but also a day of hope and new beginnings, deeply connected to the birth of Jesus Christ – a moment that symbolises faith, humility and purpose.

Reflecting on personal growth and collective ambition, he recalled the words of Paulo Coelho, emphasising the power of belief and intent in shaping the future:

“ When you want something, all the universe conspires in helping you to achieve it. ”

He highlighted that when vision, effort and faith come together, individuals and organisations alike can achieve meaningful progress. His message strongly resonated with the audience, reinforcing the idea that the Wattsun journey is driven by purpose, people and shared belief.

This was followed by an address from Mr. Das Antony, whose words further reinforced the values of commitment, unity and shared responsibility that define the Wattsun family.

Leadership Voices & Shared Reflections

The celebration continued with messages from the leadership team, each sharing their perspectives on teamwork, dedication and collective growth. Speeches were delivered by Ms. Sreeja Sureshkumary (Chief Executive Officer, Green Factory), Mr. Aslam A S (Chief Technical Officer), Ms. Priya G (Chief Finance Officer), Mr. Jaisenan Jogesh (HR Manager), Mr. Saajith Muhammed Haneefa (Project Manager), Mr. Tevince Alex (Facility Manager), Mr. Raghul M (Sales Manager – Bengaluru), Mr. Thirosh S (Technical Supervisor) and Mr. Rohan (WFA Football Coach).

Each message reflected a shared belief – that Wattsun’s journey forward is built on collaboration, trust and a strong sense of belonging.

Celebrating Talent and Joy

Interwoven with the formal proceedings were delightful cultural performances that brought colours and emotion to the celebration. Christmas songs by Jomini and team, dance performances by team members’ children, a cinematic dance performance, and soulful musical renditions created moments of joy and pride, reflecting the family-oriented culture of Wattsun.

A special milestone of the day was the unveiling of the Wattsun & Green Factory calendars, marking another year of shared progress and purpose. Laughter filled the hall during group photos and videos, especially during the joyful moment when everyone tossed their Christmas hats into the air – capturing the true happiness of the celebration..

Moments That Brought Us Closer

The celebrations continued with a cake-cutting ceremony, followed by wine, drinks and a lavish buffet lunch featuring authentic Kerala dishes and non-vegetarian specialities. The post-lunch hours were dedicated to relaxation and bonding, with team members enjoying the swimming pool and outdoor spaces.

The day concluded with a lively lucky draw, where Akshay, Abhinav and Vyshak won the first, second and third prizes respectively. Tokens of appreciation were also presented to those who contributed through performances. As a thoughtful gesture, every attendee received a 2026 diary and a plum cake.

“*Celebrations like these remind us that success is best enjoyed when shared.*”

Before dispersing, team members shared their experiences and reflections, expressing gratitude and joy. As the Kollam team departed together by bus, the return journey itself became a joyful extension of the celebration.

One Wattsun Family

Christmas Carnival 2025 was more than a celebration — it was a reflection of who we are. Across Wattsun Energy, Green Factory, Wattsun International, Wattsun Football Academy, and Blitz Sports Tech, we move forward as one Wattsun Family, united by sustainability, innovation and people-first values.

GREEN ENERGY INDIA EXPO – BENGALURU

Innovation, Partnerships & the Future of Clean Energy

Industry Engagement at a National Platform

The Green Energy India Expo – Bengaluru, held at Bangalore International Exhibition Centre (BIEC), brought together key stakeholders from India's renewable energy ecosystem. The expo served as a strong platform for technology exchange, customer engagement and partnership building across solar, EV and energy storage segments.

At the event, Green Factory, part of the Wattsun Group, showcased its expanding role in delivering future-ready clean energy solutions across South India.

Reliance HJT Solar Panels: The Centrepiece

The primary highlight of the Green Factory pavilion was the showcasing of Reliance HJT Solar Panels. The panels were displayed prominently at the stall, drawing consistent attention from developers, EPCs and industry professionals throughout the expo.

Visitors engaged in detailed discussions around Heterojunction Technology (HJT), appreciating its high efficiency, superior low-light performance and long-term reliability. The live display of the panels enabled customers to closely examine the build quality and technology, reinforcing confidence in Reliance HJT as a next-generation solar solution.

“Reliance HJT: Next-generation panels, designed for performance and longevity.”

Expert Interactions and Technology Conversations

The Green Factory and Wattsun teams actively engaged with visitors, offering insights into solar technologies, project implementation and regional opportunities.

“Strong technology, supported by the right expertise.”

Adding further strength to technical discussions, the Jio Things team was also present alongside Green Factory. Mr. Nihad M H, representing Jio Things, actively supported customer interactions and technical conversations at the stall, contributing valuable insights into integrated energy solutions. Together, the teams enabled deeper discussions around EV charging solutions and Battery Energy Storage Systems (BESS), reinforcing a collaborative and solution-driven approach.

RE-NXT 2025 – VIJAYAWADA

Advancing Solar Innovation Across Regions

A Regional Platform for Renewable Innovation

RE-NXT 2025 – Solar Renewable Energy Expo, held at A Convention Centre, Vijayawada, brought together key stakeholders from the renewable energy sector across South India. The expo served as an important regional platform to engage with EPCs, developers and system integrators, focusing on next-generation solar technologies and scalable energy solutions.

At the event, Green Factory, part of the Wattsun Group, showcased its growing capabilities in delivering advanced solar technologies tailored to regional market requirements.

Jio Sparq Microinverter & Reliance HJT: The Key Highlights

The Green Factory stall prominently featured Jio Sparq Microinverters and Reliance HJT Solar Panels, both of which attracted strong attention from visitors throughout the expo.

The Jio Sparq Microinverter demonstrations sparked interest among installers and developers for their flexibility, safety and performance advantages in modern rooftop systems. Alongside this, the Reliance HJT panels on display reinforced the shift towards high-efficiency, next-generation solar modules, appreciated for their superior output and long-term reliability.

“*Smart inverters and advanced panels together define the future of solar installations.*”

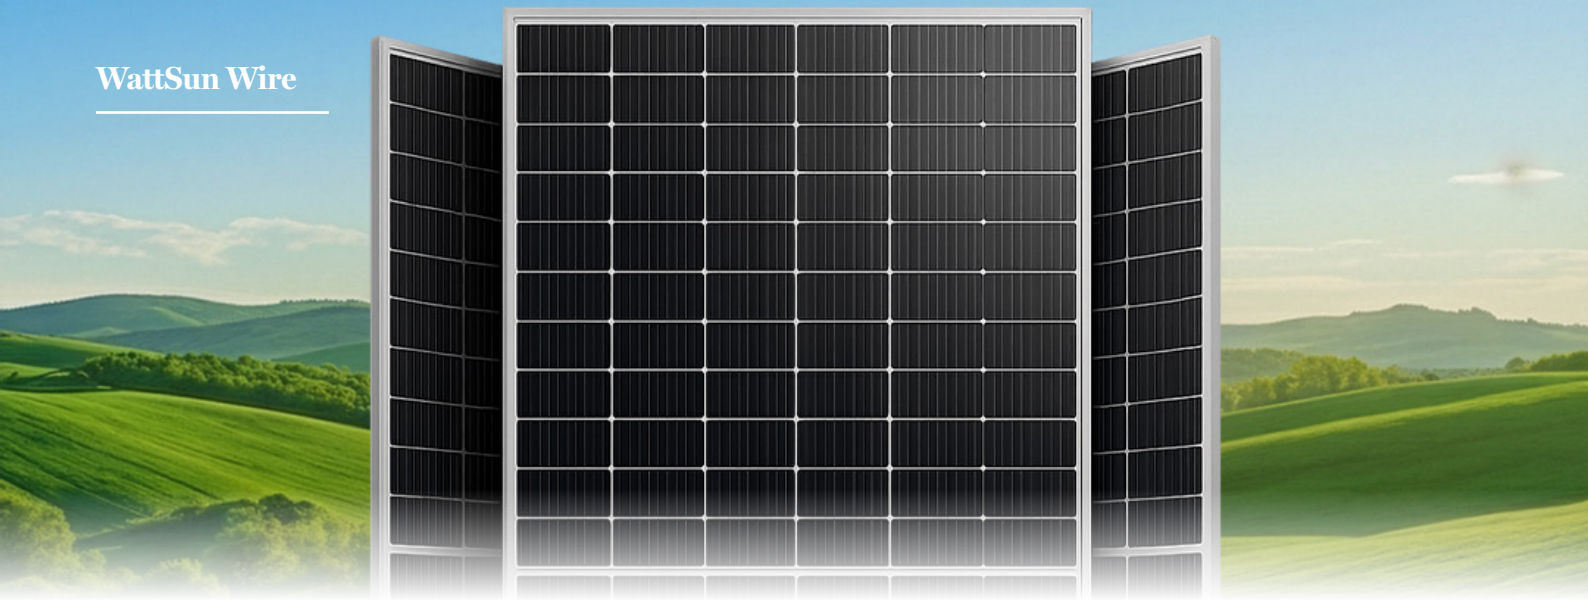

Engaging Conversations and Growing Opportunities

The expo witnessed active discussions around project requirements, system design and technology adoption. Visitors engaged closely with the Green Factory team to understand how integrated solutions—combining microinverters and high-efficiency panels—can enhance overall system performance.

RE-NXT 2025 further strengthened Green Factory's regional presence, opening doors to new partnerships and reinforcing confidence in its role as a trusted provider of future-ready solar solutions across Andhra Pradesh and neighbouring regions.

PRODUCT SPOTLIGHT:

RELIANCE HJT SOLAR MODULES

Powering the Next Phase of Solar

Next-Generation Solar Technology

Reliance HJT Solar PV Modules, powered by advanced Heterojunction Technology (HJT), represent a new benchmark in high-efficiency solar solutions. Designed for utility-scale, commercial and large rooftop applications, these modules deliver superior energy yield, long-term reliability and consistent performance across diverse operating conditions.

With power classes ranging from 690–720 Wp, Reliance HJT modules are engineered to meet the growing demand for high-capacity, future-ready solar installations in India.

Engineered for Performance & Longevity

Reliance HJT modules combine precision engineering with robust manufacturing standards, offering clear advantages for long-term energy generation:

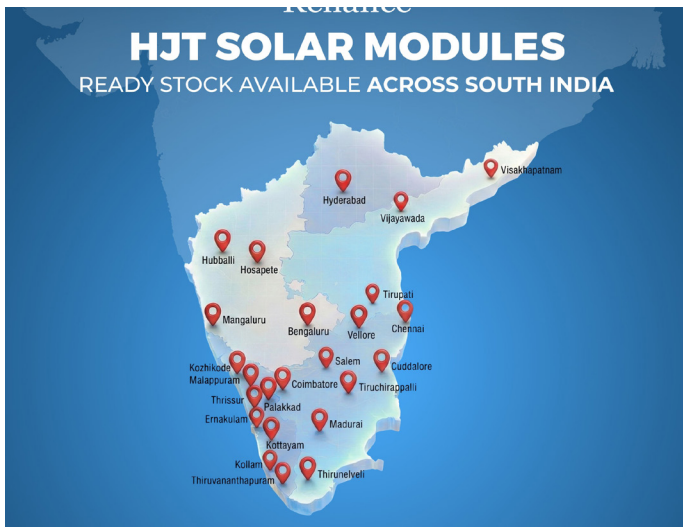

- High module efficiency (up to 23%+)
- Superior low-light performance for extended generation hours
- Lowest temperature coefficient, reducing heat-related losses
- Ultra-low annual degradation, ensuring stable output over decades

- 30-year performance warranty
- ALMM listed, compliant with Indian regulatory requirements

These attributes make Reliance HJT modules an ideal choice for MW- and GW-scale power plants as well as performance-driven commercial projects.

“ When efficiency meets endurance, power truly goes beyond limits. ”

Trusted Access Through Green Factory

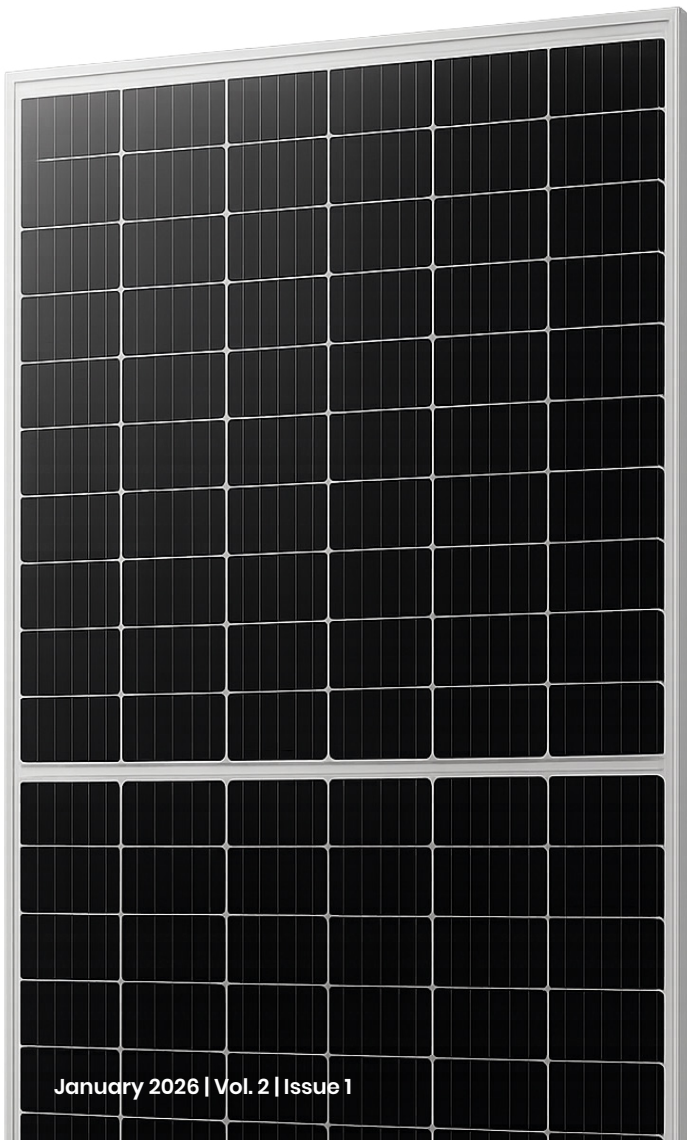

Green Factory proud to introduce Reliance HJT Solar Modules in South India, Green Factory plays a key role in bringing next-generation solar technology closer to developers, EPCs and project owners across the region.

With ready availability of stock and strong technical support, Green Factory ensures faster deployment, reliable supply and seamless execution for high-capacity solar projects. Backed by the Wattsun Group's execution expertise, Green Factory enables customers to adopt advanced HJT technology with confidence.

“ Advanced technology delivered with regional strength and reliability. ”

Vision Driving the Technology

Reliance's focus on HJT technology aligns with a long-term commitment to clean, scalable and affordable energy. Mukesh Ambani has consistently emphasized that the future of energy must balance innovation, sustainability and accessibility.

This vision is reflected in Reliance HJT modules—designed to support India's transition towards a resilient, high-performance renewable energy infrastructure.

“ The energy of the future must be clean, affordable and accessible to all. ”

— Mukesh Ambani

A MILESTONE OF TRUST AND PARTNERSHIP

Recognised by Favourite Homes

Wattsun Energy was honoured to receive tokens of appreciation from Favourite Homes during the key handover ceremony, reflecting a partnership built on trust, consistency, and dependable execution. These recognitions were presented as part of the handover and milestone events for The Laurels and Illam, two premium residential developments by Favourite Homes.

The awards were presented by Mr. Martin Thomas E, Managing Director, Favourite Homes, and received on behalf of Wattsun Energy by Mr. Saajith Muhammed Haneefa, Project Manager, and Mr. Sanker N. K., Project Manager, acknowledging their roles in delivering reliable solar solutions aligned with quality construction and timely execution.

“ Meaningful partnerships are built over time—through reliability, shared values and consistent delivery. ”

These moments of recognition reinforce Wattsun Energy’s commitment to long-term collaborations where accountability and performance form the foundation. As Favourite Homes continues to shape thoughtfully designed living spaces, Wattsun Energy remains proud to contribute clean energy solutions that add lasting value to such developments.

Mr. Martin Thomas E, Managing Director, Favourite Homes, presents tokens of appreciation to Mr. Saajith Muhammed Haneefa, Project Manager, and Mr. Sanker N. K., Project Manager, Wattsun Energy, during milestone events of The Laurels and Illam, recognising a partnership defined by trust and performance.

KNOWLEDGE LEADERSHIP AT THE SOLAR & BESS SUMMIT

Kalaiyarasi M, National Sales Manager, represented Green Factory during the knowledge sessions, contributing to discussions focused on market trends, technology adoption, and the evolving needs of the renewable energy sector. The recognition received at the summit reflects Green Factory's continued involvement in industry-level knowledge sharing and professional engagement.

Such forums play an important role in strengthening industry understanding and encouraging collaborative growth across the solar ecosystem.

Green Factory was represented at the Tamil Nadu Solar Business Association – Solar & BESS Knowledge Summit 2025, held at Courtyard by Marriott, Trichy, a platform that brought together industry professionals to exchange perspectives on solar and battery energy storage systems.

WattSun

BUILDING ENERGY, BUILDING CAREERS.

At Wattsun Energy and Green Factory, growth is rooted in a belief that people are at the heart of everything we build. We see our employees not merely as professionals, but as a family—individuals who grow together, support one another and share a common purpose.

Our philosophy is simple: when employees are valued, customers receive the best experience. By creating an environment where people feel trusted, heard and empowered, quality and consistency naturally reflect in every project we deliver. This people-first approach is the reason our customers continue to place long-term trust in us.

Where Skills Meet Opportunity

As solar adoption accelerates across residential, commercial and utility-scale projects, the scope of our work continues to expand. This growth creates opportunities across office-based functions and on-ground execution, bringing together engineering, sales, service, project management and technical support teams under one shared mission.

For freshers, this is a place to learn the fundamentals through real-world exposure and guided mentorship. For experienced professionals, it offers the opportunity to take ownership, lead responsibilities and contribute to large-scale, impactful projects that shape the clean energy landscape.

“ Great outcomes are built by teams that learn, adapt and grow together. ”

A Culture That Supports Growth

Professional development at Wattsun Energy and Green Factory extends beyond roles and responsibilities. Exposure across regions, technologies and project scales encourages continuous learning, while teamwork and collaboration ensure that no one grows alone.

We believe that stability, respect and shared responsibility create long-lasting careers. By investing in people—through trust, learning and opportunity—we build teams that are confident, capable and committed. As we continue to expand, we remain focused on nurturing talent that aligns with our values of integrity, accountability and purpose.

Growing Together, Moving Forward

Renewable energy is more than an industry—it is a long-term commitment to progress. At Wattsun Energy and Green Factory, we are building not just systems and solutions, but futures shaped by people who believe in sustainable growth.

As our journey continues, we look forward to growing alongside individuals who are ready to learn, contribute and become part of a family that values people first and progress always.

Those interested in exploring career opportunities with Wattsun Group may share their resume at cv@wattsun.in or contact **+91 89433 45718**.

Voices of Trust Customer Testimonials

★★★★★

Ajith Vijayakumar

Installed a 4 KW solar plant at my res. Right from the sight inspection till the plant got live, Wattsun had taken care the process with professionalism. All departments was supportive and gave proper guidance when needed. Thank you all

★★★★★

Luttu jithin

In our home we have installed 3kw solar panel in last month June 2025 through Wattsun Energy India Pvt Ltd.. Today we get the first current bill after install solar panel only 292/-Rs, before one month still I payed 6000/-Rs. I am so happy and thanks to Mr.Bijil (one of the solar testing Engineer of Kollam) and thanks to Wattsun Energy India Pvt Ltd...
