

SARANGI APPOINTED SECI CMD **LEADERSHIP SHIFT TO BOOST SOLAR PUSH**

Senior IAS officer Santosh Kumar Sarangi has been appointed as the new Chairman and Managing Director (CMD) of the Solar Energy Corporation of India (SECI), while concurrently serving as Secretary of the Ministry of New & Renewable Energy. Sarangi brings to SECI a strong background in policy-making and administration, having previously held the post of Director General of Foreign Trade. His appointment follows the sudden removal of the previous CMD, Rameshwar Prasad Gupta. With SECI playing a central role in India's solar mission, Sarangi's leadership is expected to drive faster implementation of large-scale solar projects and policy innovation in the renewable energy domain.

SOLAR SURGE: INDIA ADDS 10 GW IN JUST 4 MONTHS

In a landmark achievement for the country's renewable energy ambitions, India added over 10 GW of solar capacity between January and April 2025 — the highest quarterly addition recorded in the past five years. This historic growth brings the nation's cumulative solar capacity to an impressive 108 GW. The surge is attributed to favorable policies, declining technology costs, and heightened investor interest ahead of the June 2025 phase-out of the 100% ISTS charge exemption. The broader renewable sector also saw a significant boost, with total additions (including wind) hitting over 13 GW, reaffirming India's steadfast progress toward its 500 GW target by 2030.

A VISION FOR A GREENER TOMORROW: WATTSUN AT THE JANMABHUMI EXHIBITION

Shri Rajeev Chandrasekhar (State President, BJP Kerala), Shri George Kurian (Union Minister of State for Minority Affairs & Fisheries, Animal Husbandry & Dairying), and Shri G. Suresh Kumar (film producer and actor) visit the Wattsun Energy pavilion and interact with the team during the Janmabhumi Golden Jubilee Exhibition.

Wattsun Energy was proud to be part of the prestigious Janmabhumi Golden Jubilee Celebrations Exhibition, held from May 7 to 11 at Poojappura, Thiruvananthapuram. This landmark event showcased India's developmental journey with a special emphasis on Kerala's progress. Wattsun's stall highlighted innovative solar solutions and its unwavering commitment to sustainable energy. The exhibit attracted widespread attention for its advanced solar technologies, smart energy systems, and role in promoting decentralized clean energy models.

Adding to the pride of participation, several prominent figures visited the Wattsun stall and engaged with the team, including Shri Rajeev Chandrasekhar (State President, BJP Kerala), Shri George Kurian (Union Minister of State for Minority Affairs & Fisheries, Animal Husbandry & Dairying), and Shri G. Suresh Kumar (film producer and actor). Their presence and appreciation further validated Wattsun's mission of driving clean energy adoption across Kerala and beyond. The event offered a valuable opportunity to connect with industry stakeholders, dignitaries, and the public, reinforcing Wattsun Energy's role in powering a greener future.

WATTSUN SHOWCASES SOLAR EXCELLENCE AT SBI RENEWX EXPO 2025

Mr. K R Jyothilal IAS, Additional Chief Secretary (Finance), Mr. Narendra Nath Veluri IFS, and Mr. Noushad Sharafudheen, KSEB Nodal Officer, visiting the Wattsun Energy stall at SBI RenewX Expo 2025.

Wattsun Energy proudly participated in SBI RenewX 2025, held from 9th to 11th May at Salvation Army Ground, Trivandrum. Presented by SBI RenewX and supported by ANERT and Trivandrum Corporation, the event was a vibrant platform for innovation and green transformation.

As a leader in solar solutions for residential, commercial, and industrial sectors, Wattsun showcased its latest technology and reaffirmed its commitment to reliable, efficient solar energy backed by strong engineering and service. The expo provided valuable opportunities to connect with industry leaders and clean energy advocates, sharing insights and exploring collaborations for a sustainable future.

At Wattsun, we believe the future is solar—and RenewX motivates us to keep shining brighter.

Mr. Terance Alex, Founder & CEO of Wattsun Energy, receiving the Participation Award at the SBI RenewX Expo 2025.

WATTSUN SUCCESS STORY TRUSTED BY HOMES, POWERED BY THE SUN

5 kW Solar Power Plant
Dr Mini Jayaraj M/O Mr. Aromal Raj, Kollam

3 kW Solar Power Plant
Mr. Shaji Neelambaran, Karunagappally, Kollam

Across Kerala, more and more homeowners are turning to solar—and they're choosing Wattsun Energy for its engineering excellence, transparency, and customer-first approach.

Mr. Aromal Raj, recently installed a 5kW solar power system, shares:

"From the initial consultation to the final installation, the process was seamless. Saajith, our dedicated engineer, guided us through every phase with clarity and professionalism."

One of the most appreciated aspects of his experience was Wattsun's support in managing government documentation and securing the KSEB subsidy, all without hassle. *"Their pricing is competitive, and their quality standards are top-notch. The project was completed to perfection,"* Aromal adds.

Mr. Shaji Neelambaran echoes this satisfaction. After installing solar panels at his home, he was impressed not only by the technical precision of the work, but also by the care the Wattsun team took in educating him.

"They explained every detail, answered all my questions, and ensured I knew how to maximize the performance of my system. I've already noticed energy savings—and the satisfaction of contributing to a cleaner planet is unmatched."

These testimonials reflect what Wattsun stands for: delivering not just installations, but trust, savings, and energy independence. From handling approvals to offering post-installation support, the company consistently exceeds expectations.

At Wattsun Energy, every installation is a promise kept—and every happy customer is a shining story of solar success.
